

FUEL STORAGE – STATIONARY

ENVIROBULKA CONTRACT

1,389 – 4,394 Litres

The EnviroBulka Contract offers you the superior security and versatility for stationary fuelling applications. Featuring a lockable equipment cabinet and accessible design, these bulk storage units are ideal for economic projects that still require maximum security and reliability with fuel storage and handling.

With a 110% bunded design that complies to BS799 & Oil Storage Regulations for Businesses, the EnviroBulka Contract ensures an environmentally safe solution for bulk fuel storage.

FEATURES

ACCESS HATCH

Access hatch for easy maintenance into the inner tank.

LIFTING EYES

Lifting eyes for easy handling (empty only).

LOCKING SYSTEM

Locking system to protect your liquid assets.

BEARERS

Tank bearers for easy placing in position and moving if required (when empty).

FULLY BUNDED

The cabinet spill sump contains any spills or drips. The tank is 110% bunded to comply with PPG2 Regulations. Manufactured to BS799 part 5 for above ground oil storage.

BS799

IDEAL USES & APPLICATIONS

LONG TERM FUEL STORAGE

The EnviroBulka Contract offers an efficient solution to long-term storage requirements. Strategically designed to store fuel in specific locations for long periods of time. This range of fuel tanks is ideal for long-term economic projects, on sites that require large amounts of fuel.

BULK FUEL STORAGE

EnviroBulka Contract static tanks can be used to refuel vehicles, construction machinery and agricultural equipment efficiently. This range is ideal for large equipment fleets that require constant fuel storage on site - allowing significant cost savings with purchasing of fuel.

STANDBY POWER APPLICATION

EnviroBulka Contract tanks are ideal for large projects that require generator power installations, or other standby applications. Tanks can efficiently connect to 2 diesel powered pieces of equipment and refuel equipment via pump at the same time.

COMPLETE FUELLING SOLUTION

Due to large fuel storage capacities, EnviroBulka Contract tanks are used for transport depots, plant yards and farms – offering a complete static fuelling point on site, reducing the risk of spills and unnecessary tank movements.
